

Fluid Fill

Global fluid fill leader manufacturing complete turnkey systems
Durable and flexible designs to exceed customers' expectations
Extensive background in providing customized filling products and services

→ Fives Cinetic, engineering custom filling solutions

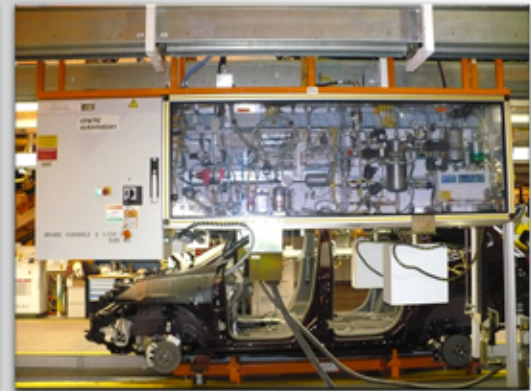

Engineering and manufacturing custom assembly and test solutions for over 40 years

Fives Cinetic's priority is to provide our customers with flexible options in fluid fill applications

■ Fluid Fill Applications

- Brake
- Coolant
- Urea
- Transmission
- HFO-1234yf
- Power Steering
- A/C
- Windshield
- Fuel
- Brake APD

▶ Adapter

▶ Coolant Base Unit

▶ Brake Mobile Unit

■ Features

- Completely automated fill process
- Customized tooling presentations
- On board supply sources
- Auto clamping adapters
- Automatic start/stop filling process
- High speed fill rates
- Various cycle and process options (customizable)
- Verification of fill volume
- Operator interface panel
- Multiple selection criteria
- Continuous monitoring of the fill process
- Fault indicators
- Vehicle identification/bar code readers
- Calibration test equipment

■ The Cinetic Advantage

- Global leader with over 30 years of experience
- Broad product range to meet the customers' various demands
- Multiple worldwide locations to reduce cost and expedite delivery times
